

Kevin Mock

T56/501 Chief Design Engineer

Rolls Royce Corporation

Kevin Mock is the T56/501 Chief Design Engineer for Rolls Royce Corporation located in Indianapolis, Indiana. Kevin has worked for Rolls Royce for 29 years with principal accountability for engine system integration, safety, and whole engine attributes for the T56/501 family of engines (T56 Series II, III, IV; IVA, and Series 3.5). In addition, Kevin provides technical leadership and direction for commercial and military operators, while continuing to improve the outstanding 50+ service history of this engine. Previous to this role, Kevin has held several other assignments in the design, development, and manufacturing of several other Rolls-Royce engine applications.
