

**Director, Division of Aerospace Sciences
Air Warfare and Weapons Department
Office of Naval Research**

Dr. Knox T. Millsaps is the Director of the Division of Aerospace Sciences in the Air Warfare and Weapons Department at the Office of Naval Research (ONR) in Arlington, Virginia. He serves as the senior focal point within ONR for basic and applied research investments in air platform and weapons research that enable enhanced performance, affordability and reliability for future Navy and Marine Corps air platforms and weapon systems. Dr. Millsaps oversees research and development in the areas of fixed and rotary wing aerodynamics, aeromechanics, flight mechanics, power, propulsion and thermal management, advanced materials and structures, hypersonics, directed energy weapons and counter directed energy technologies, energetic materials, combat aircraft survivability, autonomous vehicles and aircraft carrier deck operations, as well as the development of computational and experimental tools for future engineering design efforts.

Dr. Millsaps entered the Senior Executive Service in August 2015. He is a Professor and Chairman Emeritus at the Naval Postgraduate School (NPS) in Monterey, California. From 1992-2015 he was a Professor of Mechanical and Aerospace Engineering at NPS, founded the Marine Propulsion Laboratory, and was the Department Head from 2008-2014. He also served as the Associate Provost for Academic Affairs (2005-2006) and the Associate Provost for Institutional Development (2006-2008). He was the Program Manager for the NPS Distance Learning Programs to the Naval Nuclear Propulsion Program for Bettis Reactor School Engineering Graduates (2002-2014), started the NPS-DL Program for Navy Test Pilot School, and was the founding Executive Agent for the DoD Scholarship-for-Service, Science Mathematics and Research for Transformation (SMART) Program. He was a Congressional Fellow (2000-2001) and Staff (2001-2002) for Representative John Spratt on the House Armed Services Committee (HASC). He worked as a Junior Engineer at Pratt and Whitney (1983-1984) in the Military and Space Engines Division in West Palm Beach, FL, and as a Staff and Senior Staff Engineer in the Commercial Engines Division in East Hartford, CT (1985-1988).

Dr. Millsaps has conducted research and published in the areas of turbomachinery aerodynamics, heat transfer, and rotordynamics, Diesel engine diagnostics, signal processing, advanced energy and thermodynamic cycles, and synthetic- and bio- fuel combustion. He has worked on ship and other platform signature control programs. He is and a member of ASME and AIAA and past Chairman of the Board of Directors for the International Gas Turbine Institute (IGTI), where he serves as a member of the Turbomachinery and Marine Committees.

Dr. Millsaps holds a Bachelor's with High Honors in Engineering Science from the University of Florida and a Master's and Doctorate in Aerospace Engineering from MIT. He was named an Outstanding Alumnus by the University of Florida in 2007.
